

## **LayerGauge *USBGate***

USB connection for all *LayerGauge*<sup>®</sup> instruments

Until now *LayerGauge*<sup>®</sup> instrument has been connected to a PC computer via special measuring board, AT connection card, installed in PC. This connection, though reliable, is limiting the options to update PC computers. Connection used is nowadays available only in special industrial type PCs.

For convenience of all *LayerGauge*<sup>®</sup> users Davinor has introduced a new USB connection module: *LayerGauge USBGate*. This module connects any *LayerGauge*<sup>®</sup> -instrument to PC computer using standard USB port. Users are no longer tied to special requirement for type of PC.

This connection provides all existing features of *LayerGauge*<sup>®</sup> with familiar M-Flex user interface, so no additional training or changes in measuring practices are needed.

## Technical Description

**GENERAL** USBGate is external hardware module for connecting *LayerGauge* multilayer thickness gauge to PC computer via USB port. USBGate connection provides all controls of older AT-connection card.

**HARDWARE COMPATIBILITY** Hardware compatible with any *LayerGauge* instrument manufactured or updated after 1993, and with a PC computer equipped with either USB 1.1 or USB 2.0 connection port.

**SOFTWARE COMPATIBILITY** Software compatible with Davinor M-Flex measuring software and Windows 2000 or Windows XP operating systems

**SIZE** 15 x 15 x 5 cm

**INCLUDED IN PACKAGE** - Davinor USBGate connection module,  
- USB connection cable,  
- Software drivers for Davinor M-Flex measuring program. These drivers are designed to operate with Windows 2000 or Windows XP operating system.

**OTHER** *LayerGauge* should be re-calibrated after installation of USBGate module.  
**Please ask Davinor for USBGate and calibration service package.**
